

Dispute Resolution Process Flows

Disputes Resolution High-level Process Flow

Effective dispute resolution depends on coordinated handoffs, documented procedures, and end-to-end case visibility.

ECOSYSTEM OVERVIEW

Cardholder

Raises the dispute and provides supporting information

Issuer

Receives the claim, assesses eligibility and submits the dispute

Network

Sets dispute rules, timeframes and reason; routes messages and funds

Acquirer

Receives the dispute for the merchant and coordinates the merchant response

Merchant

Reviews the claim and either accepts it or provides evidence to challenge it

DISPUTE MANAGEMENT LIFECYCLE

1

DISPUTE INTAKE

Growth

- **Receive claim:** contact centre, branch
- **Verify** cardholder and impacted transaction(s)
- **Record** reason (fraud or non-fraud), dates, amount, etc.
- **Block / reissue** if account security is at risk
- **Create a case**, add required notices, and assign owner

2

DISPUTE TRIAGE

Payment Services / Fraud

- Assess whether **dispute rights exist** (e.g., filing window, dispute condition eligibility)
- Assess potential **write off** and **recovery options**

3a

CASE PREPARATION & DOCUMENT ASSESSMENT

Payment Services / Fraud

- Review the **case** and **supporting** information / documents (e.g., cardholder statement, transaction data, etc.)
- Gather **missing information** and supportive **evidence**

3b

PROVISIONAL CREDIT ISSUANCE

Finance

- Confirm **amount** and **customer account**
- **Post provisional credit** within Visa SLAs
- Track **provisional credit aging** and reversal

4

NETWORK SUBMISSION & RESPONSE

Payment Services / Fraud & Central 1

- Submit the dispute **to C1**
- Monitor **acceptance, response, and representation**
- Respond to **requests** and **escalate** when appropriate
- Maintain a complete **case audit trail**

5

RESOLUTION & RECOVERY

Payment Services / Fraud & Finance

- **Finalize or reverse** the provisional credit, as applicable
- **Notify the cardholder** of the decision
- **Record** recoveries, losses, fees, and required general ledger entries
- **Archive supporting evidence** and close the case
- Prepare **reporting** and trend analysis

Run in parallel

Disputes Resolution – 1. Dispute Intake (Branch & Contact Centre)

Effective dispute resolution depends on coordinated handoffs, documented procedures, and end-to-end case visibility.

?

VISA DEBIT DISPUTE QUESTIONS:

1. Confirm **transaction details** (date, amount, merchant name)
2. Confirm **merchant recognition** — do you recognize the merchant name at all, even if you don't recall the specific purchase?
3. Confirm for **recurring/subscription billing** — is it possible this is part of a recurring subscription?
4. Confirm the **reason for the dispute** — did you not receive the goods/services, receive something different than described, get charged twice, get charged the wrong amount?
5. Confirm **prior merchant contact** — have you already contacted the merchant to try to resolve this directly? If so, what was their response?

Owner: Growth

Disputes Resolution – 2. Dispute Triage

Effective dispute resolution depends on coordinated handoffs, documented procedures, and end-to-end case visibility.

Disputes Resolution – 3A. Case Preparation & Document Assessment

Effective dispute resolution depends on coordinated handoffs, documented procedures, and end-to-end case visibility.

Risk (R-002): In the current state, disputes follow a multi-hop, manual handoff process — submitted via the existing trace form to Central 1, then passed to PPJV, and finally to Everlink, which manually re-keys the dispute details into Visa Resolve Online (VROL). Each manual transcription point introduces the risk of transposition errors, omitted or mismatched fields (e.g., transaction amount, dispute reason code, cardholder account number, or transaction date), and misalignment between the original trace form and what is ultimately filed in VROL. These errors can result in delayed or rejected dispute submissions, missed Visa filing deadlines—increasing potential non-compliance with Visa's dispute requirements.

Disputes Resolution – 3B. Provisional Credit Issuance

Effective dispute resolution depends on coordinated handoffs, documented procedures, and end-to-end case visibility.

Decision Pending (D-010): The provisional credit will be issued in parallel with the investigation, to meet 2 business days Visa SLA.

Risk (R-001): Cardholders may exploit the provisional credit process by submitting a fraudulent or unsubstantiated dispute, receiving the credit, and then becoming unreachable or closing the account before the investigation concludes or the credit can be reversed — resulting in an unrecoverable loss to the institution.

-  Customer journey
-  Issuer journey
-  Next stage handoff
-  Process Ends

Disputes Resolution – 4. Network Submission & Response

Effective dispute resolution depends on coordinated handoffs, documented procedures, and end-to-end case visibility.

120 days from transaction date (75 days in specific conditions)

¹Dispute processing steps vary by dispute type, and each escalation stage (e.g., pre-arbitration, arbitration) carries its own conditions that must be satisfied before the dispute can proceed.

²Arbitration carries additional cost. Visa applies filing and review fees, so the expected recovery should be weighed against the cost and likelihood of success before Beem file.

Disputes Resolution – 5. Resolution & Recovery

Effective dispute resolution depends on coordinated handoffs, documented procedures, and end-to-end case visibility.
