1 Purpose

This guideline and procedure document outlines the requirements that the Credit Union's AML Compliance Team must follow to ensure that all Large Cash Transaction Reporting (LCT) and Electronic Funds Transfer Reporting (EFT) are submitted to FINTRAC as required.

2 LCT & EFT Reporting

The following section outlines how the Credit Union submits LCT and EFT reporting to FINTRAC.

As the Credit Union does not facilitate virtual currency transactions, no Large Virtual Currency Transaction Reporting (LVCTR) is required.

Through regular transaction monitoring of Credit Union membership and transaction activity, reportable LCT and EFT transactions will be identified and generate events within Navaera's Enview IMF Domain.

Any events that generate automatically within Navaera's Enview IMF domain will be reviewed and submitted to FINTRAC by the AML Compliance Department.

2.1 LCT & EFT Filing

The AML Compliance Department will ensure that all required LCT and EFT events are being submitted to FINTRAC by reviewing applicable LCT and EFT reports and determining whether any manual LCT or EFT events need to be submitted to FINTRAC. The process to identify any manual EFT and LCT reports and how to submit those will be outlined in this document.

2.1.1 Straight Through Processessing (STP) for LCT

The Credit Union utilizes Navaera's STP feature to reduce manual filing of LCT referrals in Navaera. All LCT events that generate with all required information and do not trigger an automatic reject rule will be automatically submitted to FINTRAC.

2.1.1.1 LCT STP Reject Rules

The following reject rules are currently in place:

- If the conductor is not a beneficiary on the personal account where the funds were deposited, then the LCT should reject as we must manually review and include third-party details
- If province/country of registration/incorporation does not populate for entities - auto reject
- For relationship, if the transaction is not a night deposit and the conductor is not an individual authorized to bind the entity then the LCT will be auto rejected for manual review.
- For Source of funds if the transaction is not a night deposit and source of funds (How was the cash obtained) is blank then the LCT will auto reject for manual review.
- For purpose of transaction if the transaction is not a night deposit and purpose of transaction is blank then the LCT will auto reject for manual review.

2.2 eReceipt Dashboard

To align with the Credit Union [Large Cash Transaction Reporting \(LCTR\)](#) Guidelines, an eReceipt Dashboard report has been developed to provide all information that is required to be input into the eReceipt application for cash deposit transactions. This includes:

- non-member conductor information
 - First and last name
 - Address
 - DOB
 - ID
 - Relationship to beneficiary
 - etc.
- Third-Party information
 - Not required to be completed for employees depositing to employer's accounts
- Source of funds
- Purpose of payment

This Dashboard is to be used in conjunction with the information input into the transaction override note #127.

2.3 Missing Required Reporting Information

During the submission of EFT & LCT referrals, if missing information is identified, the AML Compliance Department will send an email to the branch management team where the transaction occurred requesting to follow up with the member to obtain the necessary information. The branch will be responsible for updating the banking system as well as responding to the AML Compliance Team within a designated timeframe.

2.3.1 Email Template to Branch

A reportable (Large Cash Transaction/Wire Transfer) was conducted by XXEMPLOYEE NAME for the member noted above on XXXDATE. We have identified a deficiency in the information recorded for that transaction and require the following information be provided.

Information Required by 3pm today, XXXDATE:

Please provide updated employment information:

- Employer and Specific Position
- Source of Funds
- Purpose of Payment
- Relationship between conductor & beneficiary

Update DNA as necessary

2.3.2 Unable to Obtain Missing Information

If the missing information cannot be obtained by the branch or from the banking system or member file documents, the following steps must be followed:

1. Submit the EFT/LCT referral to FINTRAC in Navaera without the missing information
2. Add a note speaking to the deficiency under the applicable membership in Sunflower
 - a. Log into Sunflower Application
 - b. Search for PERS/ORG number
 - c. Navigate to Notes tab
 - d. Add Note:
 - i. *EFT/LCT Referral #XXX was submitted on XXXDATE without required information (i.e. occupation). Information was unable to be located in DNA or in the member file, and multiple failed attempts were made by the branch to collect this information from the member. Referral submitted to ensure reporting timelines were met.*
 - e. Click Add Note

3 LCT Reporting

A Large Cash Transaction Report (LCTR) must be submitted to FINTRAC within 15 calendar days after the Credit Union receives a large cash deposit which equals or exceeds \$10,000 CAD equivalent made in a single transaction or multiple transactions within a 24-hour static period (00:00:00 to 23:59:59 each day)

A LCTR must be filed on the appropriate party involved in triggering the LCT including:

- Transacting Person (Conductor)
- Account Holder (Beneficiary)
- Third-Party (On Behalf of)

3.1 LCT Aggregation Types

3.1.1 Transacting Person (Conductor)

The conductor of a large cash transaction is the person attending the branch to deposit the funds. They can deposit money to a business or personal account. If they deposit over \$10,000 to a single or multiple accounts, they will trigger an LCT on the conductor.

The conductor is recorded in the banking system by frontline staff selecting the “Transacting Person” during the posting of cash transactions.

3.1.2 Account Holder (Beneficiary)

The beneficiary is the account holder who benefits from the cash deposit. This can be an entity or an individual and is indicated in the banking system with the Tax owner (TRO) role or a joint account owner role.

This type of aggregation trumps the others if all transactions within the LCT report are the exact same. If transactions have a different conductor, or different beneficiaries, then there may be a situation where 2 LCTs with the same transactions may be filed.

This is the most common type of LCT aggregation the Credit Union conducts.

3.1.3 Third Party (On-Behalf Of)

If there is someone instructing the conductor to make a cash deposit to an account, or the conductor states that they are depositing cash “on behalf of” another person or entity, this would be a third-party transaction. If the same third-party is identified to instruct cash deposits over \$10,000 a LCT will be triggered.

Third party information is stored within the LCT Exception Note Override.

This is the least common type of large cash report.

3.2 Aggregation Examples

3.2.1 Conductor

June conducts the following 3 deposits on the same day that total \$10,000:

Acct 1 – 123 BC Ltd - \$3,000

Acct 2 – June’s personal account - \$3,000

Acct 3 – Dog Groomers Inc - \$4,000

A large cash report is required to be filed on the conductor, June.

3.2.2 Beneficiary

June conducts the following 3 deposits on the same day that total \$10,000:

Acct 1 – 123 BC Ltd - \$3,000

Acct 2 – 123 BC Ltd - \$3,000

Acct 3 – 123 BC Ltd - \$4,000

Even though June has conducted all of the transactions (conductor aggregation) the LCT is only required to be filed on the Beneficiary as all information is the same for all 3 transactions, even with the cash being deposited to different accounts owned by 123 BC Ltd.

3.2.3 Conductor & Beneficiary

June conducts the following deposits:

Acct 1 – 123 BC Ltd - \$3,000

Acct 2 – June’s personal account - \$3,000

Sally conducts the following 3 deposits on the same day:

Acct 1 – 123 BC Ltd - \$3,000

Acct 2 – 123 BC Ltd - \$3,000

Acct 1 – 123 BC Ltd - \$4,000

Because June has conducted 1 deposit to 123 BC ltd 2 large cash reports will be required:

LCT #1 - Beneficiary

Acct 1 – **123 BC Ltd** - \$3,000 – Sally

Acct 2 – **123 BC Ltd** - \$3,000 – Sally

Acct 1 – **123 BC Ltd** - \$4,000 – Sally

Acct 1 – **123 BC Ltd** - \$3,000 – June

LCT #2 – Conductor

Acct 1 – 123 BC Ltd - \$3,000 – **Sally**

Acct 2 – 123 BC Ltd - \$3,000 – **Sally**

Acct 1 – 123 BC Ltd - \$4,000 – **Sally**

Because there are different conductors in LCT #1 it will be required to be reported as 1 LCT on the beneficiary that received all of the deposits for that day.

In LCT #2, 3 transactions have the same conductor so an additional LCT report will be filed on the conductor, Sally.

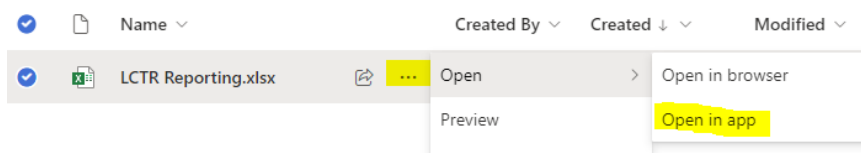

3.3 Verifying LCT Event Generation

The following section will outline how the AML Compliance Team ensures that all required LCT transactions are being generated as an event in Navaera, and what steps to follow should a manual LCT report be required to be submitted in Navaera.

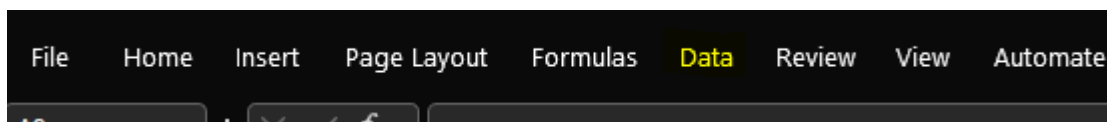

3.3.1 Reviewing LCT Report

The following report is to be reviewed at minimum on a weekly basis, but best practice would be to review daily, to ensure that all LCT transactions have generated an event and been submitted to FINTRAC as required

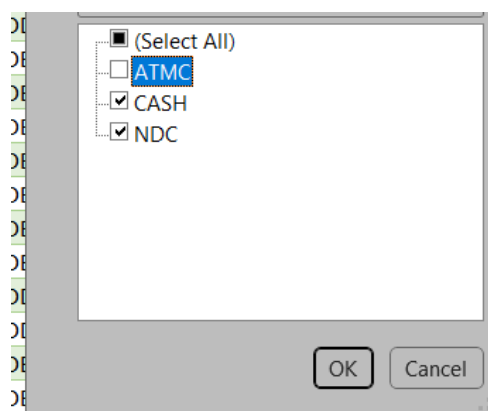

1. Access the Credit Union LCTR Data report
 - a. Click on the link below to access the LCTR Report.
 - i. [LCTR Reporting.xlsx](#)
 - b. Open report in Excel app

- i.
- c. Refresh the report by clicking on **Data** on the top bar.

- i.
- d. Select **Refresh all** - This will refresh all LCT transactions from the previous day.
- e. Filter in the **Cash Fund Type** to exclude ATMC

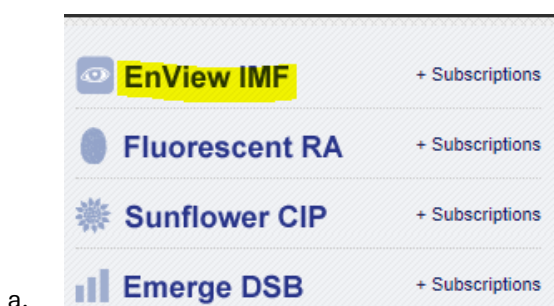

- f.
 - g. Click OK
 - h. Highlight the previous days transactions and **copy**
2. Open the LCT Verification Report excel sheet in the Excel App:
 - a. [Daily LCT Verification Report.xlsx](#)
 - i. Note: this spreadsheet is stored in Team under *DEPT-Compliance* → *AML* → *Documents* → *AML* → *AML Administration Procedures* → *LCT and EFT Reporting* → *Daily LCT comparison to Navaera*
 - b. LCTR Transactions Tab
 3. Paste what you copied from the LCTR Reporting excel sheet to the Daily LCTR Verification excel sheet you just opened.
 4. Close the LCTR Reporting Excel sheet
 5. Refer back to the Daily LCT Verification Report
 6. Highlight the new rows added and “Custom Sort”
 - a. Column B – Date – Oldest to Newest
 - b. Column F – TRO – A to Z

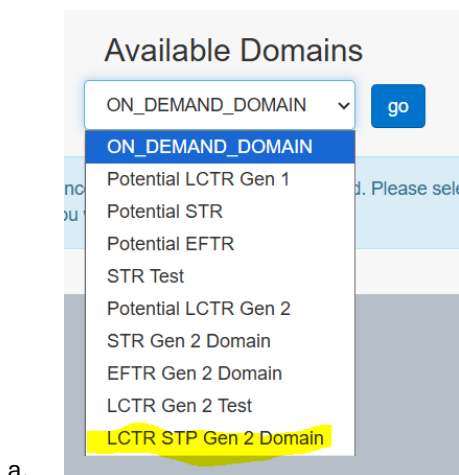

- c. Sort
7. Separate each LCT referral that is required to be submitted with a blank row
8. Highlight any transactions that are not required to be reported as an LCTR:
 - a. Exempt entities (public body (i.e. municipalities), crown corporation, etc.) – **Orange**
 - b. Transactions that do not trigger the reporting threshold (ex. aggregated on Night Deposit – All branches Transacting person) - **Purple**
9. Once you have added the information, proceed to log into Navaera and follow the next section.

3.3.2 Review Non-STP LCT Events in Navaera

1. Log into Navaera and open the Enview IMF Domain

2. From the Drop Down, open **LCTR STP Gen 2 Domain**:

3. Under dashboard navigate to the Events page
4. From the events screen select an event to open
 - a. if the event was not assigned to you, you will be asked if you would like to assign the event to yourself.
 - b. Click on assign to me

Workflow Actions - Event: 89754

- ## Events

Customer	Details	dReports	Event History	Notes	Objects	Event Home

1-3 of 3

- a.

Once the two previous steps have been completed, the AML Compliance Team will compare the LCT report against the LCT events in Navaera, to verify whether all identified LCT transactions have been captured, that all events have generated, or whether a manual LCT Referral must be created.

1. Open an LCT Event and click **Customer**
2. Under the customer tab you will find the person or organization that the LCT generated on
3. Review the LCT Report Excel sheet and find the appropriate pers/org under either of the following columns:
 - a. TRO
 - b. JNT Account Holder
 - c. Transacting Person
4. Back in the Event click the **Details** tab
5. Under the Details tab you will see all transactions that have generated in the LCT Event

- a.
6. Compare the transactions in the LCT Event to the LCT Report
 - a. If all Transactions have been included in the LCT Event:
 - i. Highlight the applicable rows in the excel sheet - **Green**
 - ii. Proceed to Submit the LCT Referral
 1. Refer to [Filing an LCTR in Navaera](#) for instructions on adding transactions and filing an LCT in Navaera
 - b. If LCT transactions are missing from event proceed to add the missing transactions and file the LCT referral
 - i. Refer to [Filing an LCTR in Navaera](#) for instructions on adding transactions and filing an LCT in Navaera
 - ii. Once complete highlight the applicable rows in the excel sheet - **Green**
 - c. If LCT event did not generate than a manual LCT will need to be submitted
 - i. Refer to [Filing an LCTR in Navaera](#) for instructions on manually filing an LCT in Navaera
 - ii. Once complete highlight the applicable rows in the excel sheet - **Blue**

3.3.4 Review STP LCTs in Navaera

To review LCTs that have been submitted to FINTRAC through STP refer to the following procedure:

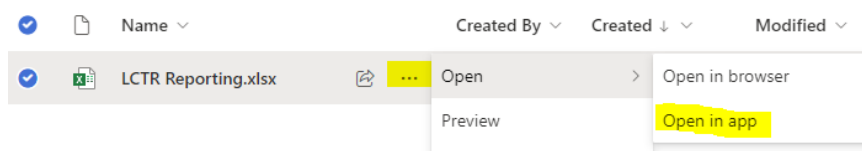

[Beem - AML Admin - Navaera Emerge - LCT Gen 2 STP Report.pdf](#)

3.4 Reviewing ATM Deposits for Potential LCTRs

The following report is to be reviewed on a weekly basis to ensure that any ATM LCT transactions are identified and submitted to FINTRAC as required

6. Access the Credit Union LCTR Data report
 - a. Click on the link below to access the LCTR Report.

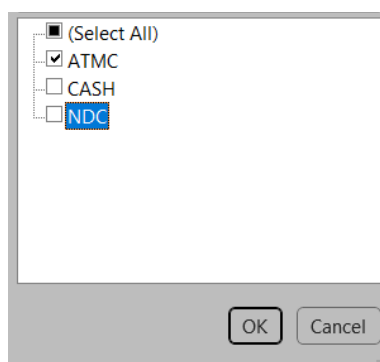

- i. [LCTR Reporting.xlsx](#)
- b. Open report in Excel app

- i.
- c. Refresh the report by clicking on **Data** on the top bar.

- i.
- d. Select **Refresh all** - This will refresh all LCT transactions from the previous day.
- e. Filter in the **Cash Fund Type** to exclude CASH & NDC

- i.
- f. Click OK
- g. Highlight the previous week of transactions and **copy**
7. Open the LCT Verification Report excel sheet in the Excel App:
 - a. [Daily LCT Verification Report.xlsx](#)
 - i. Note: this spreadsheet is stored in Team under *DEPT-Compliance → AML → Documents → AML → AML Administration Procedures → LCT and EFT Reporting → Daily LCT comparison to Navaera*
 - b. ATM Deposit Review Tab
8. Paste what you copied from the LCTR Reporting excel sheet to the Daily LCTR Verification excel sheet you just opened.
9. Close the LCTR Reporting Excel sheet
10. Refer back to the Daily LCT Verification Report
11. Highlight the new rows added and “Custom Sort”
 - a. Column B – Date – Oldest to Newest

- b. Column F – TRO – A to Z
 - c. Sort
12. All rows where the deposit has cents can be highlighted – **grey**
- a. As coins cannot be deposited to the ATM these deposits will be cheques and not cash
13. All round dollar values (multiple of 5) totaling over \$5,000 will be verified by reviewing the transaction against the Brinks Report or ICDR Report

Reviewing the Brinks Report

For Credit Union branches that utilize brinks to balance ATM deposits, a daily report is sent to the AML Compliance email and stored here:

AML Inbox → Brinks Reports → ATM Reports

- Subject: BEEM ATM Reports MMMM DD YYYY
- Document: ATM Summary Report MMMM DD YYYY
- Document will be password protected: GFFGMMDD

As Brinks verifies ATMs the following business day, the report to be reviewed will be the report for the following business day proceeding the transaction date.

To review the Brinks Report:

1. Open the report for the applicable date
2. CTR + F
3. Enter the MemberCard used to conduct the deposit
 - a. Open balance history for account where transaction was deposited
 - b. Select ATM Deposit from transaction history
 - c. Click **Card Txn**
 - d. In the Card Transaction Details Screen **Card Number** field can be identified
4. Click Search
5. To determine cash or cheque review the following columns:
 - a. Bill Total – this is the amount of cash deposited
 - b. Cheque – this is the total value of the deposit that was cheque
6. Determine whether Manual LCT Referral is required
 - a. Yes
 - i. Highlight Row in Excel Sheet as **Green**
 - ii. Proceed to Submit the LCT Referral
 1. Refer to [Filing an LCTR in Navaera](#) for instructions on adding transactions and filing an LCT in Navaera

- b. No
 - i. Highlight row in Excel Sheet – **Grey**
 - ii. Nothing further required

Reviewing the ICDR

The ICDR report will show any foreign ATM deposits that consisted of cash. If not on the ICDR report it will be assumed that the deposit was a cheque.

Refer to the following link for instructions on reviewing the ICDR

[Beem - AML Admin - ICDR Job Aid.docx](#)

ICDR Report for the Credit Union is located here:

S:\Share\Ficanex-ICDR Files

Reviewing Central 1 ORS

It may be possible to determine whether an ATM deposit consisted of one singular cheque by searching for the deposit amount in OAS.

To search for the deposit enter the date range in for 1 business day after the deposit was conducted, enter the amount of the deposit, and search for a cheque.

If there is a potential match, review the cheque image to see if the payee on the cheque matches the cardholders. If it is a match the ATM deposit can be confirmed as a cheque.

If no match, it may be possible that more than one cheque or cash was deposited and another method to verify will need to be used.

ATMs Balanced by Branches

If an ATM deposit cannot be verified by one of the above methods (ORS, Brinks, ICDR) the AML Compliance Team will send an email to the branch that owns and balances the ATM requesting confirmation of the ATM envelope contents.

Email Template:

An ATM deposit was conducted at your branch's ATM <TERMINALID> which we require further information on the content of the ATM envelope to determine whether a LCT report is potentially required.

Please provide us information on the following ATM deposit contents (cash/cheque):

<MEMBERCARDNUMBER>

DDMMYYYY

\$Amount

To ensure that any potential regulatory reporting is submitted on time, please provide this information to us before the end of the day DDMMYYYY

3.4.1 Identifying Cash Transactions

If a cash deposit is identified to have been conducted through the ATM, the AML Compliance Team will also review the banking system to determine whether a 24-hour LCT aggregation has been triggered for the beneficiary by conducting a review of all demand accounts.

3.4.2 Manually Reporting ATM LCTR

If an ATM deposit transaction is identified to have triggered a LCTR a manual LCT will need to be submitted in Navaera.

Refer to [Filing an LCTR in Navaera](#) for instructions on manually filing an LCT in Navaera

4 Manually Creating a LCTR in Navaera

Refer to the following Procedure document for steps on how to manually create and file LCT referrals in Navaera:

[Reporting LCTs in Gen2 Navaera - AML Compliance Procedures.pdf](#)

5 LCT Reporting Exceptions

The Credit Union is **not required** to submit a Large Cash Transaction Report on the following entities:

- Financial Entities
- Public Body, including
 - Crown Corporations
 - Municipalities
- a person who is acting on behalf of a client that is a financial entity or public body

6 EFT Reporting

All incoming and outgoing international wires of \$10,000.00 CAD equivalent or more must be reported to FINTRAC. EFT reports must be submitted to FINTRAC no later than five business days after the day of transfer. The day of transfer means:

- Final Receipt of EFT (Incoming) - the day the instructions were transmitted to the Credit Union
- Initiation of EFT (Outgoing) - the day the Credit Union transmits the instructions regarding the transfer of funds.

The Credit Union must also submit an EFTR to FINTRAC in accordance with the 24-hour rule, where:

- The Credit Union initiates 2 or more international EFTs that total \$10,000 CAD equivalent or more within a static 24-hour window, and you know that the transactions:
 - were requested by the same person or entity
 - were requested on behalf of the same person or entity (third party), or

- are for the same beneficiary (person or entity)
- The Credit Union finally receives 2 or more international EFTs that total \$10,000 CAD equivalent or more within a static 24-hour window, and you know that the transactions:
 - were requested by the same person or entity, or
 - are for the same beneficiary (person or entity)
- Beem's static 24-hour window (00:00:00 to 23:59:59 each day)

Navaera imports EFT transactions from Central 1 PaymentStream and creates EFT Events that will need reviewed and submitted to FINTRAC.

6.1.1 PSWR reports

Navaera ingests the information from Central 1's PSWR reports to generate EFT events as required. These reports can be located here:

- Beem (Legacy ISCU):
 - [\\admin-netshare1\Data\Admin\bcc](#)
- Legacy NPS:
 - [file://admin-netshare1/Data/Admin/bcc/North%20Peace/](#)
- Legacy G&F:
- [\\gffg-fs.ucscu.com\corpdata\\$\RISK&COMPLIANCE\PSWR Reports from Central1](#)
- ***NOTE – Gulf and Fraser only has reports available back to December 6, 2024, and is adding all reporting going forward to present date.*

6.2 EFT Tracker Report

To ensure that all EFTs are generating in Navaera as required the following steps will be taken on a daily basis:

1. Open the EFT tracking excel sheet [Beem Wire Tracking Report](#)
2. Log into Central 1
 - a. Open Payment Stream – Wires application
3. Review both **Submitted & Received Wires** sections
4. Select date range
 - a. For Tuesday to Friday – input the previous day
 - b. For Monday – input the previous Friday – Sunday
5. Click **Filter**
6. Select export to **CSV**
7. Open Excel Sheet
8. Review each wire to determine whether wire triggers EFT reporting requirements
 - a. 24-Hour aggregation must also be reviewed
9. Copy any reportable incoming and outgoing wires into the EFT tracker excel sheet
10. Complete all required fields
 - a. Wire date, due date, member information, wire reference number, etc.
11. As EFTs are submitted in Navaera the event & submission number will be recorded in the tracker to support filing requirements

12. Any EFTs that do not generate an alert within Navaera by the 3rd business day will require [manual EFT submission](#)
- a. A notification to the CAMLO or CAMLO designate must be provided to follow up with Navaera to determine why the event did not trigger and resolve any issues going forward.

6.3 Auditing EFT Reporting

To ensure that all EFT reports are being submitted as required in Navaera's Enview IMF Domain, the AML Compliance Team will conduct a semi-annual review of EFT submissions for a two-week timeframe to ensure all reportable EFTs were submitted to FINTRAC as required.

6.3.1 Auditing EFT Reports

To ensure that the AML Compliance Department is filing the Credit Union's EFTs with complete and accurate information, and in adherence with FINTRAC's EFT Reporting Requirements, the AML Compliance Team will conduct a regularly scheduled review of EFT reports that have been submitted to FINTRAC.

On a semi-annual basis the AML Compliance Team will review the same 2-week timeframe as used in the above section for reviewing PWSR reports, and pull all EFT Reports that have been submitted within that timeframe.

A review of those EFT reports will be conducted to ensure that all required information has been submitted and that the information input into the EFT is sufficient and in line with EFT reporting requirements.

Should the AML Compliance Team identify any deficiencies in these EFT reports, they will:

- Notify the CAMLO of the identified deficiencies
 - CAMLO or CAMLO Designate will need to determine impact and risk of the deficiencies
 - CAMLO or CAMLO Designate will need to determine whether additional review of filed EFTRs is necessary, based on severity level and assessment of any potential harm resulting from inaccurate/missing information
 - CAMLO will determine whether VSDONC is required
- Rectify all deficiencies identified within Enview IMF and resubmit EFT to FINTRAC
 - Depending on the scope of the deficiencies, an Action Plan may be implemented to address any recalls and modifications in a timely manner and inline with VSDONC

6.3.2 Audit Findings Record Keeping

Once the EFT reporting has been completed, document the audit findings in the [EFT Audit Log.xlsx](#)

7 Manually Creating an EFT in Navaera

Refer to the following Procedure document for steps on how to manually create and file EFT referrals in Navaera:

[Reporting EFTs in Gen2 Navaera - AML Compliance Procedures.pdf](#)
