1 Purpose

The purpose of this guideline document is to provide the AML Compliance Department with information on how Navaera conducts the Credit Union’s watch list scanning, what On-Demand alerts are, and the process to review and action those alerts.

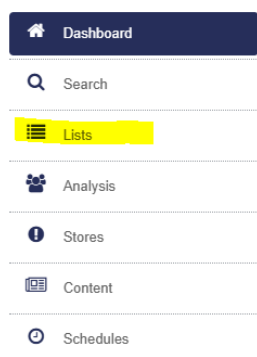

2 Watch List Scanning

The Credit Union utilizes Navaera’s watch list scanning services through the Fluorescent application to generate alerts for potential PEP and HIOs, sanctioned and designated people, Money Service Businesses, Cannabis Producers and retail stores, terrorist lists, and other lists as deemed reasonable by the CAMLO or CAMLO Designate.

2.1 Current Watch List Scans

A full list of current watch list scans being run can be viewed in the Fluorescent application in Navaera.

1. Navigate to Fluorescent Application in Navaera
2. From the home screen of the Fluorescent page select “Lists”

- a.
3. All currently active watch lists can be viewed in the “Lists” screen

2.1.1 Adding a list

To add additional lists to the Fluorescent watch list scanning application a ticket will need to be submitted to Navaera’s Client Care (clientcare@navaera.com)

The ticket will need to include the applicable reference list you wish to create or add.

CAMLO or CAMLO Designate approval must be obtained before adding a new list for scanning.

2.1.2 Removing a list

To remove a list from the Fluorescent watch list scanning application a ticket will need to be submitted to Navaera’s Client Care (clientcare@navaera.com)

The ticket will need to include the name of list you wish to remove from the scan.

CAMLO or CAMLO Designate approval must be obtained before removing a list from scanning.

3 On-Demand Alerts

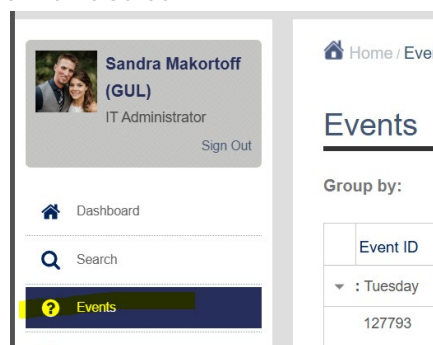

When a potential match is identified during the watch list scanning through Fluorescent, an On-Demand alert is generated in Navaera's Enview IMF application.

On-Demand alerts will be reviewed by the AML Compliance Department to determine whether a positive match has been identified, or whether it was a false match.

The AML Compliance Department will review On-Demand alerts in Navaera using the following process.

3.1 Navigating to the On-Demand Alerts

1. Navigate to Navaera's Enview IMF Domain
2. Open the On-Demand Domain
3. Enter the Events Screen

- a. Click on the event to be reviewed
 - a. Event Home – Screen will provide details around the member who may potentially be a match to a watch list, which list was matched, and the match score
 - i. Match scores will generate on tokens – 1 token = 1 piece of the member name has matched; 2 tokens = 2 pieces of the member name have matched; etc.
 - ii. The higher the risk score the higher the possibility of a true match
 - iii. Events will be actioned based on the risk score with priority going to the higher risk scored events
 - b. Details – This tab will provide information on the potential match identified.
 - i. Information can include the potential matches name, DOB, address, links to websites providing information on the potential match

3.1.1 Event Prioritization

On-Demand alerts will be actioned based on the risk score identified in the alert. Following the prioritization schedule outlined as follows:

- Score of 100 or higher, to be reviewed within 20 days

- Score or 79-99, to be reviewed within 30 days

Alerts with a match score of less than 79 are set to auto close in the Navaera Enview IMF platform as alerts under this threshold have been deemed to be within the Credit Union's risk appetite.

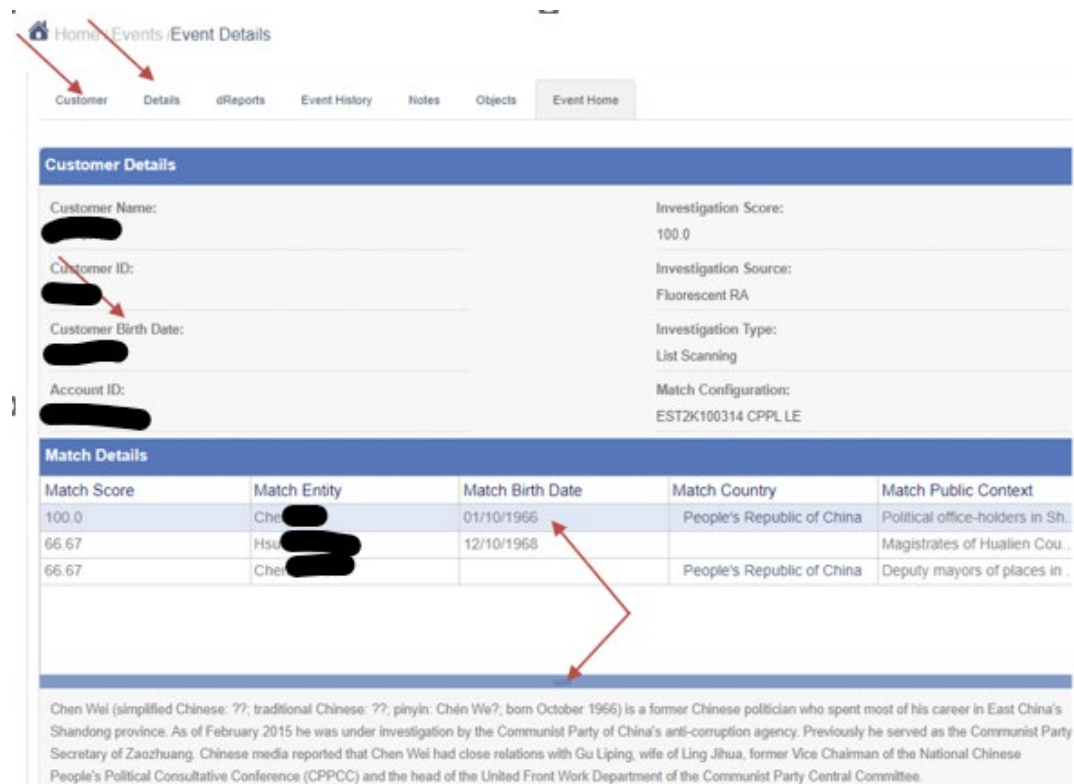

3.2 Reviewing an On-Demand Alert

The AML Compliance Department will review the relevant data within the alert to decide whether it is a positive or false match.

The information in the **Customer** section should be reviewed to determine which member has been flagged against

The data provided in the **Details** tab of the alert should be reviewed and compared against the KYM information for the member in the banking system.

Open-source searches can also be conducted to determine whether there is a positive match.

Match Score	Match Entity	Match Birth Date	Match Country	Match Public Context
100.0	Chen [Redacted]	01/10/1966	People's Republic of China	Political office-holders in Sh.
66.67	Hsu [Redacted]	12/10/1968		Magistrates of Hualien Cou.
66.67	Chen [Redacted]		People's Republic of China	Deputy mayors of places in .

Chen Wei (simplified Chinese: 陈伟; traditional Chinese: 陳偉; pinyin: Chén Wēi; born October 1966) is a former Chinese politician who spent most of his career in East China's Shandong province. As of February 2015 he was under investigation by the Communist Party of China's anti-corruption agency. Previously he served as the Communist Party Secretary of Zaozhuang. Chinese media reported that Chen Wei had close relations with Gu Liping, wife of Ling Jihua, former Vice Chairman of the National Chinese People's Political Consultative Conference (CPPCC) and the head of the United Front Work Department of the Communist Party Central Committee.

Detail:
Chen Wei (simplified Chinese: 陈伟; traditional Chinese: 陳偉; pinyin: Chén Wēi; born October 1966) is a former Chinese politician who spent most of his career in East China's Shandong province. As of February 2015 he was under investigation by the Communist Party of China's anti-corruption agency. Previously he served as the Communist Party Secretary of Zaozhuang. Chinese media reported that Chen Wei had close relations with Gu Liping, wife of Ling Jihua, former Vice Chairman of the National Chinese People's Political Consultative Conference (CPPCC) and the head of the United Front Work Department of the Communist Party Central Committee.

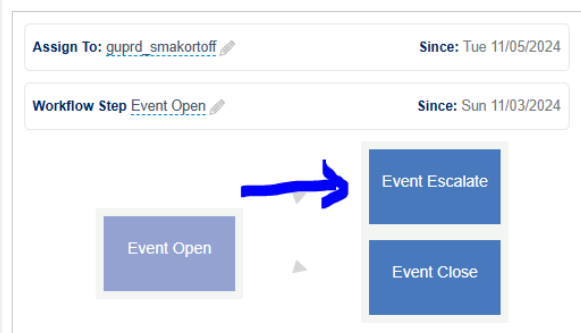

3.2.1 Positive Match

If the AML Compliance Department identifies that the On-Demand alert is a positive match to the Credit Union's member, depending on the type of watch list it will be escalated for additional Enhanced Due Diligence Measures

- PEP or HIO
 - Escalate for a [Risk Assessment](#) to be completed
- MSB, Cannabis or other high-risk entity
 - Escalate for EDD Review to be completed
- Sanctioned or Designated Person
 - Escalate to CAMLO or CAMLO Designate
- Terrorist List
 - Escalate to CAMLO or CAMLO Designate

To escalate the event the AML Compliance Team will move the event to "Event Escalate" status:

Workflow Actions - Event: 127947

1. Slide the Event Open box to the Event Escalate box
2. Assign the Alert to the applicable AML Compliance Team member who will be conducting the additional EDD Measures
3. Notify the AML Compliance Team member via email that an alert has been assigned to them with any additional information pertaining to the review.

3.2.1.1 Escalating Positive Match to CAMLO or CAMLO Designate

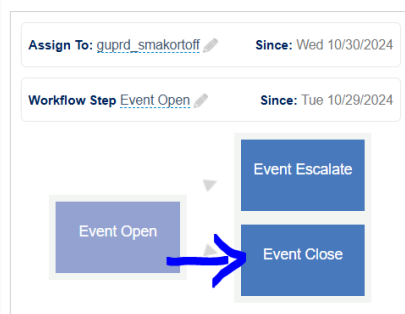

When a positive alert is identified for a **sanctioned** or **designated person or entity**, or a **terrorist** list match, the CAMLO or CAMLO Designate must be notified immediately upon identification to ensure that appropriate actions are taken.

3.2.2 False Match

If the alert has been determined to be a false match, the AML Compliance Team will close the alert with a closing comment outlining the details around how it was confirmed as not a match.

Slide the Event Opened to Event Closed box and a pop-up will generate for closing comments

Workflow Actions - Event: 127793

3.2.2.1 Closing comment examples

- *Alert was reviewed and compared to KYM Information in the banking system. DOB and middle name were not a match to our members. Not a true match, alert closed.*

- *Flagged on watchlist due to similar naming convention. DOB not a match; Gender not a match. Reviewed against banking system and open source searches; Not a true match.*
- *Flagged on watchlist due to similar naming convention. Not a PEP match; Reviewed against banking system and open-source searches; Not a true match.*
- *Not a true match to the listed entity name or address - not a PEP.*
- *Not a true match to name and address on file; not a PEP.*
- *No match – not a true match to name; DOB; gender on file; not a PEP.*
- *No match – not a true match to place of residence; reviewed against open source searches and banking system.*
- *Not a true match – photo does not match; reviewed against ID collected in banking system and membership documentation.*

3.2.3 Unable to Validate Alert

When the AML Compliance Department is unable to determine whether an alert is a match to our member due to limited details included in the alert. The AML Compliance Team will email the member's home branch to request that the branch reach out to their member and confirm details related to the potential match. This can include:

- Having the member complete a PEP/HIO determination
- Confirming current occupation/nature of business
- Updating any missing KYM Information
- Asking the member additional questions
