1 Purpose

This document outlines what a Suspicious Transaction (ST) Event is and the procedures that Beem's AML Compliance Team follows to review activity flagged in Navaera.

2 AML Monitoring Software - Navaera

To assist in meeting ongoing monitoring obligations, Beem had adopted the use of Navaera's EnView application. EnView provides both transaction monitoring and prescribed reporting services. EnView transaction monitoring reviews the monetary transactions processed through all accounts held with Beem for common indicators of money laundering. The activity monitoring and prescribed reporting conducted through EnView contributes to the overall risk score for each member.

2.1 Monitoring Accounts for Common AML Indicators

EnView has a series of AML schemes in place to help detect potential money laundering activity. These schemes are designed using known AML indicators. AML schemes are modified or added as necessary based on the Operational Alerts and other Guidance as released from time to time by FINTRAC.

2.1.1 Current AML Monitoring Schemes

Navaera Scheme Code	Scheme Short Description	Scheme Analysis Description
AML001	Bounded Structuring of Deposits or Withdrawals	Identifies customers who are depositing or withdrawing funds below a specified aggregate amount. This rule is typically implemented to identify customers whose behavior is indicative of an attempt to avoid LCT reporting thresholds.
AML002/ RBF003	Fund Circulation	Identifies where a customer is using one or more accounts to circulate funds. Circulation of funds is a typical money laundering scenario, where funds will be deposited, then rapidly withdrawn from one or more accounts. Fund circulation monitoring is also used to monitor potential cheque kiting scenarios, where a customer will deposit funds, then withdraw rapidly, prior to the clearance of any deposited cheques.
AML006	Round Dollar Large Transactions	Identifies transactions that involve large, round dollars.
RBF005	Large Value e-transfers (Repetitive Deposits and Withdrawals)	Identifies customers that conduct large or multiple e-transfers within a specified timeframe.

RBF005	Large Value bill payments	Identifies customers that conduct large bill payments within a specified timeframe. Will also monitor large international transfers through online banking services.
AML014	Dormant to Active Account Status	Identifies customers that are dormant for a specified number of months, then have activity above specified thresholds.

2.2 ST Events Generated in Navaera

On a monthly basis, all monetary transactions processed through active accounts are extracted from the banking system, ingested into Navaera and run against the AML schemes. Transactions which meet the criteria of one or more schemes will generate an ST Event, which requires review by AML Compliance Team members.

ST Events generate based on the transactional activity of the previous calendar month.

ST Events will generate with a risk score between 0-100 based on the level of risk associated with the activity conducted. e Refer to Navaera's [ADX Batch Monitoring Schemes](#) for further information on event score calculation.

Currently, all ST Events with a score of 75 or less are automatically closed by the system. While the ST Events will have closed automatically, thereby negating the need for manual review, the ST Event remains within Navaera and can be reviewed when reviewing all generated or manually created events on a member.

3 Reviewing Suspicious Transaction Events

ST Events are to be reviewed and actioned within 30 days of creation. ST events will be prioritized based on the highest risk "Score" being actioned first.

ST Events are not assigned to individual staff upon creation. AML team members have specific branches assigned to them for review; and are responsible for reviewing the ST Events and taking ownership of all ST Events corresponding to their branches.

3.1 Navigating to ST Events

1. Log in to Navaera
2. Click on Enview IMF Domain
 - o If you have more than one FI linked in Navaera choose correct FI from the subscription drop down – this example shows GRF0001- legacy Grand Forks Credit Union; GUL0001 – Beem Credit Union; and ALD001 – legacy Aldergrove Credit Union

3. Select the STR Gen2 Domain from the drop down

4. From the STR Gen2 home screen, open the Events Tab
5. All outstanding events will be shown

3.2 Reviewing ST Events in Navaera

From the ST events tab you will see the following information on the events:

Events

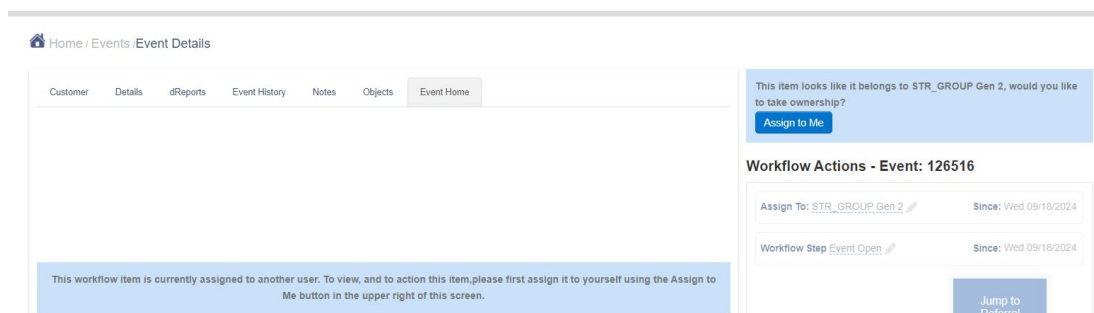

Group by: Event Date tools

Event ID	PERS/ORG Nu...	Member's home...	Score	Subject	Workflow Step	Event Date	Assigned User
▼ : Older							
126517	ORG_ [REDACTED]	ALDERGROVE	102	[REDACTED]	Event Open	Wed 09/18/2024 4:07 AM	guprd_smakortoff
126516	PERS_ [REDACTED]	GRAND FORKS	101	[REDACTED]	Event Open	Wed 09/18/2024 4:07 AM	STR_GROUP Gen 2
126508	ORG_ [REDACTED]	WESTBANK	111	[REDACTED]	Event Open	Wed 09/18/2024 4:07 AM	STR_GROUP Gen 2

- Event ID: This is the reference number pertaining to each individual event
- PERS/ORG Number: The member's associated PERS or ORG number
- Member's Home Branch: Branch where the relationship was opened
- Score: This is the risk score associated with the STR event that has generated
- Subject: Member name
- Workflow Step: all events in que will be in open status
- Event Date: date the event generated
- Assigned user: ST events will generate assigned to the STR_Group Gen 2, once picked up they will be reassigned to the AML Compliance team staff member who is investigating.

3.2.1 Review process

1. Open the ST Event you wish to review.
 - a. If the event is not assigned to you, choose 'assign to me' from the upper right-hand corner of the screen (see screenshot below). This will bring you to the home page of the ST Event.

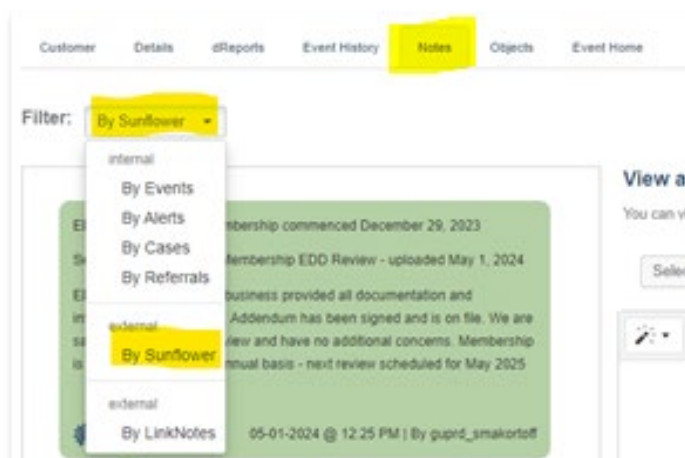

2. Review the following tabs for additional information:
 - Event home – outlines the detected AML monitoring schemes triggered

- See [Current AML Monitoring Schemes](#) for additional details on monitoring schemes
 - Customer – KYM information about the member the alert generated on including name, membership number, any related relationships, and FINTRAC filing history.
 - Details – details of the transactions flagged
 - Notes – notes associated to previous ST Events as well as EDD notes within Sunflower

3.2.2 Determine whether membership is currently on a regular EDD review schedule

In some cases, memberships that generate an ST Event may already be on a regular EDD review cycle set by an AML Specialist.

To determine whether a membership is regularly being reviewed by an AML Specialist on an ongoing basis, review the member notes by selecting “**By Sunflower**” on the Notes section of the event to determine if there is a next review date scheduled for the member.

Memberships with a current monthly or quarterly review cycle can be escalated to the appropriate AML Specialist using the process for [Escalating ST Events with Current EDD](#) for further review.

If the membership is scheduled for semi-annual or annual reviews the ST Event will need to be reviewed as outlined in the [Investigating ST Events](#) section below.

3.3 Investigating ST events

To determine whether the activity flagged within the ST Event is reasonable, or requires further review by an AML Specialist, the following investigative measures may be taken.

- I. Review the member profile in in the banking system
 - i. Review account activity to determine whether any unusual activity or indicators of ML or TF are identified

- ii. Review relevant KYM information to determine whether activity aligns
- II. Reviewing members monthly statements
 - i. Review account activity to determine whether any unusual activity or indicators of ML or TF are identified
- III. Reviewing cheque images in Central 1 ORS
 - i. Sight cheque images to assist in determining source of funds and purpose of transactions
- IV. Reviewing member file for account documentation
 - i. Documents are held in Doxim (legacy G&F) or Nautilus (Legacy ISCU)
- V. Conducting open-source searches as necessary
 - i. Determine whether any negative media can be found on the member under review
- VI. Other items as required

With information gathered during the review a determination must be made whether the activity is reasonable and in line with KYM information or should be escalated for further review.

3.3.1 If the activity is determined to be reasonable

ST Events that are reviewed and determined to have no indicators of Money Laundering or Terrorist Financing do not warrant escalation to an AML Specialist, as the activity is considered reasonable.

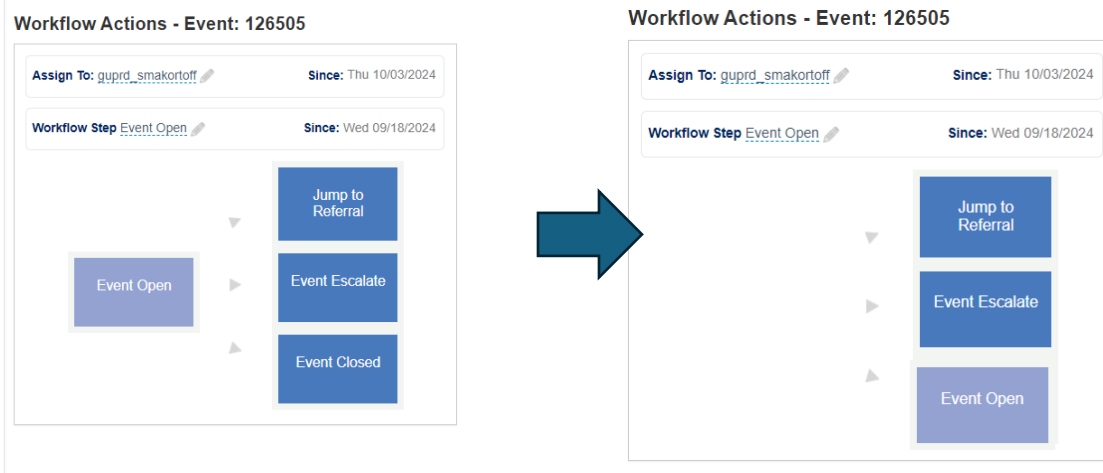

AML team members are to document their review findings in the closing notes.

Example of closing note: ST Event review was conducted including review of account activity and open-source searches, activity has been deemed reasonable and in line with KYM Information. No indicators of Money Laundering or Terrorist Financing were identified for the period of review.

Close the event and document in detail the reasonings behind the decision in the closing notes.

3.3.1.1 Closing an ST Event

From the event screen you will drag the **Workflow Step** *Event Open* to the *Event Closed* box as shown:

Once you have drag the workflow step to Even closed the following pop up box will generate where you can document your closing comments. Once comments have been enetered click save to close the event.

3.3.2 If the activity is determined to be outside of what would be expected and requires further review

ST Events that are reviewed and determined to have indicators of possible Money Laundering or Terrorist Financing and the activity cannot be immediately considered reasonable based on current information, require escalation for an unusual activity investigation or enhanced due diligence review by submitting a UAR.

The templates outlined in [Escalating an ST Event for Further Review](#) can be used when escalating an ST event for further review

3.3.2.1 Escalating an ST Event

From the event screen you will drag the **Workflow Step** *Event Open* to the *Event Escalate* box as shown:

Once you have drug the workflow step to Event Escalate the event will now show as Event Escalate in the Workflow Step on the Events home page:

Event ID	PERS/ORG Nu...	Member's home...	Score	Subject	Workflow Step	Event Date	Assigned User
126505	ORG_ [REDACTED]	ABBOTSFORD	108	[REDACTED]	Event Escalate	Wed 09/18/2024 4:07 AM	guprd_smakortoff

3.4 Escalating ST Event for Further Review

All memberships that are escalated for further review by an AML Specialist must be escalated by submitting an Unusual Activity Report (UAR) in the UAR application.

3.4.1 Submitting a UAR

Refer to Beem's Unusual activity Reporting Procedures for steps on creating a UAR report: [Unusual Activity Reporting Procedures](#)

3.4.1.1 UAR for ST event Escalation

Within the UAR reporting application the following fields can be completed as follows:

- Branch where activity occurred
 - AML Compliance Escalation
- Account number
 - If unusual activity occurred within one specific account, that account can be indicated
 - If unusual activity occurs in multiple accounts, the membership shares account can be indicated
- Date & Time of transaction
 - Indicate the first day of the month the ST event generated for
 - Ex. ST event generated on December 2024 activity, indicated 01-Dec-2024
- Method of transaction
 - Indicate the primary method of the unusual activity identified
- Ongoing monitoring

- Indicate **No** if it is an Unusual Activity Report
- Indicate **Yes** if an EDD review is required
- Activity details
 - Include as much detail as to why the membership is being escalated for further review
 - Utilize templates below as needed

3.4.2 ST Event Escalation - No current EDD Scheduled

The following template should be used in the “Activity Details” section of the UAR Reporting Application:

3.4.2.1 Template:

During a review of ST Events in Navaera we identified MEMBERXXX who has hit our radar due to the following red flags:

- *Potential circulation of funds*
- *Flow through activity*
- *Unknown source of funds*

A cursory review of the activity from DATEXXX-DATEXXX identified the following concerns:

- *high-value cheque deposits and circulation of funds between related business memberships*
- *No nature of business is on file for either of the business memberships and documentation is out of date*

Please look to conduct an EDD Review on the above referenced member and determine whether an STR will be required. The following ST event has been placed in escalated status pending a review:

- *e-123456*

Once you have completed your investigation, please look to close the alert with your closing comments or escalate to an STR referral if necessary.

3.4.3 ST Event Escalation - Monthly/Quarterly EDD Review Scheduled

When it has been identified that an ST event generates for a membership that is on a regular monthly or quarterly ongoing monitoring review, the following notes can be added to the member profile in Sunflower:

“ST Event e-123456 generated on the membership for DATEXXX activity flagging the following AML monitoring schemes:

- *Circulation of funds*
- *Dormant to active account status*
- *High volume e-transfer activity*

As membership is currently on a scheduled ongoing monitoring review cycle, ST event was closed and activity will be reviewed during the next EDD review”

Once comment has been added to Sunflower the ST Event can be closed with the following closing comment:

'Membership has been placed on a regular monthly/quarterly EDD review cycle by Beem Credit Union Compliance Department. As this membership will be reviewed on a regular basis as required, this ST event will be closed and any unusual activity identified will be reported during the next regular review cycle.'

3.4.4 ST Event Escalation – Illegal Cannabis/Illegal Online Gambling

When an ST Event is identified and activity is identified that appears to be related to illegal cannabis and/or illegal online gambling, and no other unusual activity is identified, the following steps are to be taken to determine appropriate escalation.

1. AML Administrators will review Sunflower notes for the membership flagged:
 - a. If an EDD is scheduled on the member and the ST event generated within 6 months of the last EDD review/STR Submission – the ST event is to be closed with the following closing comment:
 - i. *'Membership has been placed on a regular EDD review cycle by Beem Credit Union Compliance Department. As this membership will be reviewed on a regular basis as required, this ST event will be closed, and activity will be reviewed during the next regular review cycle.'*
 - b. If an EDD is scheduled on the member and the ST event generates for activity more than 6 months after the last EDD review/STR Submission – escalate membership for EDD review by submitting a UAR.
 - c. If no EDD is scheduled – escalate membership for investigation by submitting a UAR.

3.4.4.1 Template:

During a review of ST Events in Navaera we identified MEMBERXXX who appears to be conducting activity related to illegal online gambling/illegal cannabis. Please look to conduct an investigation based on the following red flags identified:

- *Transactions identified to third-party payment provider known for illegal gambling (ex. Gigadat/Paypyr)*
- *High volumes of e-transfer activity*

Please look to conduct an EDD Review on the above referenced member and determine whether an STR will be required. The following ST event has been placed in escalated status pending a review:

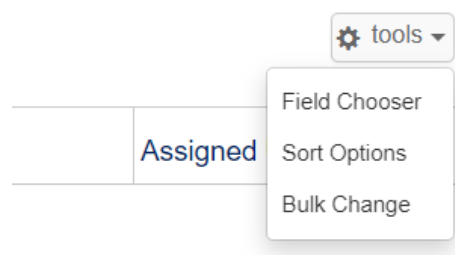

- *e-123456*

Once you have completed your investigation, please look to close the alert with your closing comments or escalate to an STR referral if necessary.

4 Navaera STR Event Screen Functions

On the Events screen in Navaera there are also other sort and update functions that can be used to assist with viewing and closing events.

In the lefthand side of the events screen you will see a Tool button. The Tool button will drop down the following options

4.1 Field Choser

The field chooser can be used to change your event screen view. You can select which columns you would like to see on your Events home screen.

4.2 Sort Options

The Sort Options option will allow you to select which columns you would like to sort the events on – ex. you can sort the Risk Score column from highest to lowest.

4.3 Bulk Change

The Bulk Change option will allow you to change a selection of events to a different workflow step or assign them to another user.

To change events to another workflow or assign to another user the following steps must be completed:

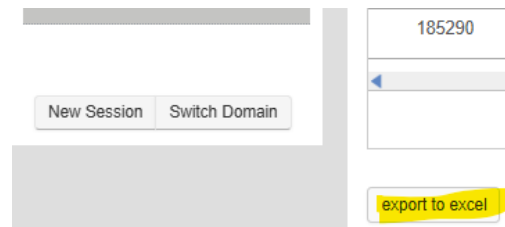

- I. Select all Events you wish to change & Click Next
- II. Select whether you want to:
 - i. Assign to another user
 - ii. Transition items through the workflow
- III. Click Next
- IV. Select either
 - i. Common steps – this will assign to the workflow selected
 - ii. Assign to – select the user you want to assign the events to
- V. Submit

If you selected to Transition the workflow to “Close the event” you will then be asked to enter a closing comment that will be entered on all events

5 ST Event Tracking

Every month after ST events have generated, the AML Compliance Team will pull an export of events to an excel format and add to an internal tracker document by completing the following process:

1. Open the Enview IMF STR Gen 2 domain
2. View the Events screen
3. Click **export to excel** →
4. Open the downloaded excel document
5. Open the ST Event Tracker document for the current year
 - a. [ST Event Tracker 2026.xlsx](#)
6. Create a new tab in the tracker document for the current month
7. Copy the information on the Navaera excel & paste into the tracker

The tracker will allow the AML Compliance Department to determine escalation rates of ST events to UAR investigations and track events that require branch follow up or further review.

6 Version History

DATE	VERSION	CHANGE
June 12, 2026	003	<i>Annual review conducted</i> <i>Added link to Navaera documentation outlining ST event score determination</i> <i>Added ST event tracking section to record events</i>
October 6, 2025	002	Update to utilize new UAR Reporting Application for escalation
August 14, 2024	001	Initial Version Created
